For Dr Eric North

How about these pictures?

TRANSFER

Dear Eric:

When I was in La Mesa, California a few days ago, I saw the clay model of Bishop Bashford's bust, and was able to make one or two suggestions. Mr. Porter is, however, in need of some profile of Bishop Bashford. All he has to work on are the pictures in Bishop Bashford's biography. It would help greatly if you could secure any other pictures, especially those in profile and send them to him--Mr. J. T. Porter, La Mesa, California Mr. Porter seems to me to have a good deal of skill, and I think that if you could give him this additional help, it would add greatly to the success of the undertaking.

I am here basking in the sunshine, which seems to be quite a contrast from the zero blizzard weather in New York, which the newspapers report to us. The young lady who is helping me with this letter remarks that to speak of snow storms and blizzards seems like a fairy tale to her after being here four years.

I am being very "good" in "going slow" and will continue to do so until a call to go down to speak at the Women's Club at La Jolla and the University Club at San Diego. I really am getting along finely.

Many thanks for your Christmas greetings. I send you my best wishes for the opening year.

Ever most truly,

Harry Wheeler
