Nov 16, 1928

Dear Garside:

I am coming down to New York on Friday , Nov 23 reaching there at 9.42 A.M. I have no very definite plans for the day further than I want to float around seeing those I most love or want to see-- and I put you in both classes!

On Saturday all day I am to attend the meeting of the "Council of Learned Societies". Please don't upset things by inquiring why they happened to include me. It would be too bad to disabuse them.

I shall probably return here Sunday afternoon tho I could stay over till Monday if there was any special reason why I should. I send you this note so that you could let me know if there was anything "doing " at that time along the lines of those things which you know I have much at heart. In any event I will blow into No. 150 sometime on Friday.

Ever yours,

N.W.L.
