INDEXED

Dear Mr. Garside

I am enclosing herewith a copy of my letter to Professor Maynard. We are expecting to be able to obtain the services of Professor Maynard from funds to be granted by the Institute of Pacific Relations, or from some other source. I am now planning to wait until my return to Nanking before obtaining the approval of the field.

Will you kindly take care of all matters in relation to Dr. Maynard's coming upon receipt of such approval. Dr. Maynard will be ready to come by the first of February, 1934.

Thanking you, I am

Very sincerely yours

J. Lossing Buck

June 26, 1935

Dr. L. A. Maynard
Department of Animal Husbandry
Cornell University
Ithaca, New York

Dear Doctor Maynard

The Research Secretary of the Institute of Pacific Relations has agreed to my making a request covering your travel to China and maintenance expense in China for the nutrition project which we discussed. Your other necessary expenses in connection with the work will be provided from our Land Utilization funds.

I have every expectation that this request will be granted. If not, there is another good possibility, and as a last resort I would take the funds from money already in hand for our Land Utilization work. Thus, except for unforeseen circumstances, you may plan definitely on coming. I will ask our University of Nanking office here in New York to proceed with obtaining the necessary information which is always secured from visiting professors for approval by the administrative authorities. I think that probably the approval of the administrative authorities will need to wait until my return to Nanking when I can make personal explanation. I do not contemplate any difficulty whatever in obtaining their approval.

I shall look forward to your assistance in this project with great eagerness, and I am sure great things will result.

My address for the next seven weeks is as follows:-

c/o Mr. R. H. Tawney
44 Mecklenburg Square
London, W.C.1, England

Best personal regards,

Sincerely yours

J. Lossing Buck

Mr. B. A. Garside,
Associated Boards of Christian
Colleges in China,
150 Fifth Avenue,
New York City.

Dear Garside:

I am enclosing a copy of the request we are making to the Institute of Pacific Relations, for your files.

I am also sending you a statement regarding Dr. Maynard, together with a statement of the work which we expect him to undertake. I am making a request for his financial support to the Institute of Pacific Relations. There is, however, a possibility that funds will not be granted by the Institute, or that if Dr. Maynard could be secured under our famine funds, we would like to use the amount given by the Institute for a soils man. We must find some way of financing a soils man also.

Sincerely yours,

J. Lossing Buck
J. Lossing Buck.

JLB:AB

P. S. -- In answer to your question as to whether or not Maynard should fill out a regular blank. I should judge the material I am sending you will give the necessary information. I would, therefore, suggest not bothering him with a blank.

REQUEST BY THE UNIVERSITY OF HANKING
FOR FUNDS FOR LAND UTILIZATION
IN CHINA
FOR THE YEARS 1934 - 1936
WITH ADDITIONAL REQUEST FOR 1933

Mr. Haiside
(Sent with Mr.
Buck's letter
6/29/33)

The budget which follows is urgently needed for the years 1933, 1934, and 1935 in order to complete the present phase of the land utilization project.

Most of the field work will be completed by the end of 1933, except field work necessary to interpret the tabulations and to determine boundaries of the various agricultural regions in the light of data obtained. The field men will be needed in the office to help speed up the tabulation work and to have charge of tabulating their own data. At least two experts are especially needed during this period, one a soil scientist, and we have in mind the return of Dr. Shaw or Dr. Pendleton, which we hope to finance through the National Geological Survey.

An expert in nutrition is desired to assist in the interpretation of the food consumption data from the standpoint of nutrition. The requirements of proper nutrition must be known before one can adequately interpret the land utilization data. Food crops that should be grown depend on the requirements of nutrition. One of the big problems is whether or not the dairy industry is needed in China for proper nutrition. A nutrition expert would be able to answer such questions and would thus help to make it possible to properly interpret the interrelation between the land utilization, population, and food problem. We have in mind obtaining the services of Dr. L. A. Maynard of Cornell University, who is especially qualified to undertake this work, and who has a leave of absence due in February 1934.

0685

He can be obtained for travel to and from China and for his maintenance in China all of which will amount to approximately \$1,500.00

The Milbank Memorial Fund is handicapped in the analysis of our population data because of a cut in its funds and because of the larger quantity of data than had been anticipated. At the present rate of tabulation the population data cannot be finished until the summer of 1935. We need the data by the autumn of 1934 in order to complete work by end of 1934. Moreover, it is desirable to speed the work along as fast as possible in the interests of efficiency. For this purpose \$520.00 is required for the present year and \$2,000.00 for 1934.

A large grant for publication of the results of the project is required in 1935. There is easily ten to fifteen times the amount of data collected in Chinese Farm Economy, which cost about \$2500 gold to publish. It is planned to publish the data in two types of volumes, one of general interest giving the outstanding results, and the other in the nature of an appendix volume giving data by the localities. It will probably be necessary to have separate volumes on land use, population, and food consumption.

This request is made as a minimum requirement for completing the present project in a workman-like manner, and with the feeling that our previous supplementary grants are sufficient to warrant the request.

*Received Mr.
Ruck's letter
6/20/53*

Training and Experience of L. A. Maynard

Born and reared on a farm in New York State.

Training: Undergraduate work at Wesleyan, A. B., 1911. *University*
Graduate study at Iowa State College, 1911-12, and
Cornell University, 1913-15. Ph. D. from Cornell
with agricultural chemistry as the major field
and plant physiology and physical chemistry as
the minor fields.

Sabbatic leave in 1925-26 spent in study under the
direction of Dr. Lafayette B. Mendel at the Yale
Medical School, with special attention to human
nutrition and physiology.

In 1927 six months spent in study in France, England,
and German as a Fellow of the International
Education Board.

Experience: Appointed Assistant Professor of Animal Husbandry
at Cornell University in 1915 to teach animal
nutrition and conduct investigations in this field.
On leave, 1917-19 for services in the U. S. Army. Re-
turned to Cornell in 1919. Promoted to Professor in
1920 and given charge of the Laboratory of Animal
Nutrition. During recent years the teaching and
investigation work of this Laboratory has dealt
with human as well as animal nutrition.

Publications: A list of publications is appended.

Religious Affiliations and Activities: Member of Presbyterian
Church. Teacher in Sunday School. At present
associated with the Cornell United Religious Work
as Treasurer of the New York Synod Committee on
Education.

Some Suggestions for a Study of the Nutrition of the Farm Family in China.

Since the diet of the Chinese farm family consists primarily of products grown on the farm, any study relating to its improvement must be undertaken with an understanding of the problem of land utilization and the other basic factors involved in the farm economy. Modifications of the diet seem feasible only in terms of agricultural practices which will fit in to the economic enterprise as a whole. Thus at the outset the problem should be approached from the field rather than from the laboratory.

Professor Buck's study reported in his "Chinese Farm Economy," furnishes exactly the desired starting point for a detailed and constructive study of the nutrition problem. The data presented in the chapter on "Food Consumption," make it apparent that a real problem is involved and the analysis of the data points clearly to certain specific factors which are involved. It is believed that a further consideration of these data by a nutrition specialist might bring out additional information, suggest further data which might profitably be gathered and aid in working out a program of further investigation. As a specific point in connection with the present data, attention might well be given to the influence of the large seasonal variations in the diet on its adequacy.

As regards further data, it would be helpful to know the incidence in certain areas of the diseases known to be caused by dietary deficiencies. In certain parts of the world where the food supply consists of products which have been little studied, data as to the prevalence of these diseases have proven fully as helpful in assessing the adequacy of the diet as a study of the products themselves. Useful data might be obtained by sending a questionnaire to mission hospitals. Depending on the outcome of this, it might be desirable for a nutrition specialist to make a survey of certain areas. Not only would this give information as to the adequacy of the diet in a given area, but by correlation with the data already obtained by Professor Buck it would furnish presumptive evidence regarding the nutritive value of specific foods and indicate how certain diets should be modified.

Professor Buck's survey showing that 90 per cent of the diet, on

0696

2
7
5
3
6
5
7

the average, comes from seeds points to a lack of the protective foods, such as leafy vegetables, milk and fruits, and to a possible deficiency as regards quality of protein. A vital problem for study is as to whether a satisfactory diet for the Chinese farm family can be obtained from vegetable sources alone by extending the use of soy beans, leafy vegetables, and other products, or whether it is desirable and feasible to introduce an animal product such as milk. It is clear that much can be done through the extension of the use of the important vegetable foods, and this appears the simpler solution although many questions of farm economy are involved. The question of the introduction of milk should certainly be given careful study, involving as it does, questions of land utilization, effects on quantity and quality of food supply, fuel supply, species and type of animal, management, soil fertility, sanitation and many others.

Since the chemical composition of some of the products used for food is not specifically known, and particularly in view of the fact that certain crops vary markedly in their content of certain nutrients, especially calcium and phosphorus, according to the soil and climatic conditions, it would seem desirable to obtain further data on chemical composition. A study of samples of a widely used cereal, gathered in different areas would tell us whether important nutritive differences are involved which must be considered in making recommendations for supplementing the present diet.

In making these suggestions as examples of promising studies, the writer realizes his very limited knowledge of the actual situation. The nutrition specialist, as he becomes better acquainted with the situation, should be able to map out a long-time program of study, and of extension of the results into practice. In developing the program a survey should be made of any nutrition studies now in progress in China which will contribute to the solution of the rural problems, in order to avoid any duplication. It may be expected that the study here proposed would indicate related problems worthy of study in the various chemical and physiological laboratories in China and thus stimulate further work in the field of nutrition.

The problem seems a highly important one upon which a distinct contribution could be made. Its study should not only contribute to the daily welfare of the people, but should also furnish information which would help mitigate the disasters of times of famine. The study would certainly bring results of value to other countries as well. China has taught the United States the nutritive value of the soy bean, and its use here is rapidly increasing, not only for animals but in the human diet as well. A land which has nourished so many people under such un-

0697

favorable conditions must have other lessons for the world which await discovery by the nutrition specialist. It is believed that this study, once started, would promise such benefits to human welfare as to enlist liberal financial support from a world public which is conscious of the large contributions now being made by the advances in the field of nutrition.

Mr. B. A. Garside,
Associated Boards for Christian Colleges in China,
150 Fifth Avenue,
New York City, U. S. A.

Dear Mr. Garside:

I am enclosing copy of a letter that is being sent to Dr. L. A. Maynard, of the Department of Animal Nutrition at Cornell University, and shall appreciate it if you will make the necessary arrangements for his travel.

The letter to Dr. Maynard will, I think, indicate the expenditures involved in the securing of his services for six months beginning February 1934, namely, his travel first class, maintenance and place to live while here. It is not necessary to pay him a salary as he will be on sabbatic leave beginning February 1934. His travel and maintenance can be provided for in the budget of the Department of Agricultural Economics.

The University is under no obligation to pay any expense in connection with Mrs. Maynard's coming, should she decide to accompany her husband, but in that case we would do what we could to provide suitable living quarters for them.

As you no doubt know, Dr. Maynard will give his time to a study of the nutrition of the farm family in China and it is felt that he will be of great assistance in the matter of improving the diet of the farmer.

Since Dr. Maynard will be a visiting professor and Dr. Buck knows him, I feel sure there will be no question as to his being able to fit into conditions at the University and in the community, and, under the circumstances I do not think he should be asked to fill out the regular candidate blank. Your help in ensuring his reaching China will be very much appreciated.

Sincerely yours,

Y. G. Chen.

*Letter of Y. G. Chen
dated 10/20/33*

October 20, 1933.

Dr. L. A. Maynard,
Department of Animal Nutrition,
College of Agriculture,
Ithaca, New York.

Dear Dr. Maynard:

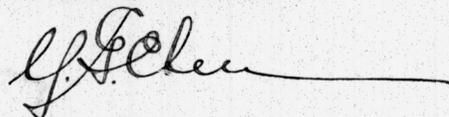

It gives me great pleasure to extend to you an invitation to join our University staff as a visiting professor during your sabbatical leave from Cornell University, beginning with February, 1934. We are inviting you to be with us for a period of approximately six months and we are happy to be able to offer you first class travel for yourself from Ithaca to Nanking and return, and maintenance for yourself while in China. We also extend a cordial invitation to Mrs. Maynard to accompany you and become a part of our University group.

We will find living quarters for you with a family or in a small apartment. If you have any preference we will be glad to hear from you and will do our best to fulfill your wishes if our crowded housing conditions permit.

Will you kindly arrange for your travel through Mr. B. A. Garside who will advance the necessary funds and will make the steamer reservations for you on such steamer as you may desire. Please feel free to call upon Mr. Garside for any help in connection with arranging for your trip.

We shall look forward to seeing you here and we know that you will be able to make a great contribution to the work here.

Sincerely yours,

Y. G. Chen,
President

Dear Mr. Garside:

I presume that you have in your files the copy of the letter which Professor Buck wrote me on June 26, with reference to my trip to China in connection with the nutrition project. While this letter indicated that the plan was fairly certain to go through barring unforeseen circumstances, I have been expecting before this to receive the final word in the matter.

I cannot make the final plans for the adjustment of my personal affairs, etc., until I have the final word in the matter. Since the time of departure is now less than three months off, it is time that I should be completing my arrangements.

I am writing you in the matter in the possibility that you may have received some further word with reference to the proposition, particularly as Professor Buck's letter indicated that I should expect some communication from your office. Of course, I realize that there may not have been time for a letter to reach me after Professor Buck's arrival in China and thus that your office may not have had any further word in the matter any more than I.

*(no later word
for field)*

Sincerely yours,

L. A. Maynard

Dear Doctor Maynard:

Let me acknowledge receipt of your letter of November 6th.

We have had no word from Professor Buck since he sailed from the United States in June. We will be glad to send a cablegram to Nanking asking for confirmation of the arrangements he discussed with you earlier in the summer.

Pending the receipt of further word from China, I am bringing to the attention of our Founders' Committee on Instruction, the information in regard to your training and qualifications which Professor Buck gave us before he sailed for China. If the Committee desires further information on any point, I will get in touch with you again during the next few days.

Very sincerely yours,

Dear Brother Garside:-

I am returning the correspondence with Dr. Maynard herewith. If my understanding is correct, and he is going out on special funds and not as a missionary of the University of Nanking, it seems to me that this data would be ample. But if he is to be considered a missionary, even if only for a year or some similar period, we ought to at least follow up some of his church contacts and have confirmatory recommendations from the men who know him well. I say "at least" that much - it might be better to have the blanks in regular order.

Cordially yours,

Mr. B. A. Garside
Associated Boards for
Christian Colleges in China
150 Fifth Avenue
New York City, New York

Dear Mr. Garside:

As I have looked over sailing schedules, it appears that the best arrangement is for me to take the Dollar Line Boat (President Cleveland) which sails from San Francisco on February 9th. I cannot leave Ithaca until February 1st. I desire to go via Honolulu because I want to have a chance to talk with Dr. Vivian Appleton, who spent considerable time in China studying child health and nutrition. I note that there is a Canadian-Pacific boat leaving Vancouver on February 10th. but I should prefer to sail from San Francisco. I am enclosing a cabin plan of a Dollar Line boat.

I should like to have you engage passage for Mrs. Maynard and myself tourist class. We should prefer one of the following cabins in the order given, 21, 19, 16. You will note that these cabins have a bath. I am not entirely sure that this plan I enclose applies to the President Cleveland but I suppose that it does, at least these cabins which I have suggested will indicate to you the type which we have in mind. If there is no tourist cabin with bath available in a good location on the boat then I would prefer one without bath satisfactorily located. If there does not seem to be anything available corresponding to what I have indicated, I would appreciate your writing me what is to be had before making final arrangements.

After you have purchased the transportation for Mrs. Maynard and myself if you will bill me for the difference between the cost and the First Class transportation which

November 21, 1933

is allowed me, I shall be glad to remit for same.

I do not want a round-trip ticket because I shall return by the faster Northern route in order to allow me as much time as possible in China. It is possible Mrs. Maynard will desire to change her ticket later to a "Home Town to Home Town Round the World" ticket on the Dollar Line. I shall be glad to have you ask the agent what the cost of such a ticket would be and whether the change could be made. I have in mind that Mrs. Maynard may return from China around the other way.

I appreciate very much your looking after this transportation for me. I trust that it will not prove too burdensome.

Sincerely yours,

L. A. Maynard

L. A. Maynard

Copy for Candidate File

University of Nanking

November 22, 1933

Dr. L. A. Maynard
Department of Animal Husbandry
Cornell University
Ithaca, New York

My dear Dr. Maynard:

Let me acknowledge receipt of your letters of November 20th and November 21st. I have also received a copy of the letter President Chen wrote you on October 20th. We will be very happy to go forward with your arrangements as promptly as possible. Since the Board of Founders of the University of Nanking is required to pass on the appointment of all members of the University staff going out from the West, I have already taken steps to lay the information with regard to you before the proper Committee of the Board. I know we can count on the hearty approval of your appointment. The information in regard to you which Professor Buck supplied before he sailed for China last summer will give us most of the facts the Committee will wish to have.

As I have gone over this material with the chairman of the Committee he has suggested that it would be helpful if we had one or two letters of reference, such for example, as might be supplied by Dr. Hugh Moran or the pastor of your church in Ithaca. We are already acquainted with your warm interest and your wide activities in practical religious matters, so I am sure the Committee would not hesitate at this point in any event. But it is just as well to have all the material for which any member of the Committee is likely to ask, so if you have no objection, I will send the usual reference blanks to Dr. Moran, and also to the pastor of your church if you will give me his name and address.

In accordance with your letter of November 21st, we have made tentative reservations for you on the President Cleveland, sailing from San Francisco to Shanghai on February 9th. The Dollar Line office here is endeavoring to get cabin #21 for you, and in the meantime will reserve cabin #19 for your use in case #21 should not be available. The cost of either #21 or #19 including the bath will be U.S. \$199 for each ticket. If you wish to purchase a return ticket, which you could use either on a Dollar Line steamer coming back to Seattle or one coming back to San Francisco, you can get the return ticket for \$549.45. If you wish to purchase a round the world ticket from San Francisco, via Shanghai back to New York, it can be obtained for \$368.00. This last named figure is a very attractive one, and has only recently been established by the Dollar Line. In the case of both the return ticket and round the world ticket, it would of course be necessary to purchase the entire ticket at one time. To purchase the homeward

0716

2
7
5
3
6
5
7

Dr. L. A. Maynard

- 2 -

11/22/35

bound ticket in Shanghai or the remainder of the round the world ticket, would be more expensive. In addition to the above figures, there is a tax of \$5.00 on each ticket. However, our office will return to you the regular 5% agency commission we receive on these tickets, so you will save that amount. (Please keep confidential the return of this commission. Naturally it would not increase our popularity with other Dollar Line agents to give publicity to it.)

The cost of a first class ticket across the Pacific is \$311.40, plus \$5.00 tax and minus 5% commission, a net amount of \$300.85. In purchasing tickets for you and Mrs. Maynard, we will give you credit for this \$300.85, and charge you for the remainder. Since we will also be advancing to you the amount necessary to purchase your railway tickets, we will simply charge this expenditure over steamship tickets against the allowance for railway transportation, and adjust with you the net balance or deficit.

As special appointees to the staff of the University of Nanking, both you and Mrs. Maynard will be entitled to travel for clergy rates. This means a substantial saving on your railway journey, approximating 40%. We will send you clergy application blanks about the first of January for you to fill out and return to us. We will then secure the blanks and send them to you for your use when purchasing your railway tickets. It is better for you to purchase the tickets than for us to do it, both because you will wish to work out your own plans for crossing the continent and also because you must personally sign the clergy blanks used in securing your reduction in fare.

I am returning herewith the cabin plan you sent. The Dollar Line informs us that the plan of the President Cleveland is approximately the same as this.

us
AS SOON as you know definitely how you wish to purchase tickets for you, please let us know and we will act accordingly. The Steamship Company would like to have these matters settled as promptly as they can be but it would not be absolutely necessary to reach a final decision until thirty days or so before the boat sails.

Please feel free to call on us at any time for any assistance we may be able to give in connection with any other details of your journey.

Very sincerely yours,

Dear Mr. Garside:

I appreciate very much your letter of November 22nd. It is very kind of you indeed to go to the trouble of obtaining all of this information for me. It is just exactly what I want.

Before making my final decision as to the tickets to be purchased, I should like to know the sailing schedule of the American Mail Line for the time of my return trip, namely, the month of August, 1934. If there is a boat sailing at the right time I can then arrange to purchase a round trip ticket from the Dollar Line and thus make a further saving. I also have in mind that I can return by one of the Dollar Line boats which goes via Hawaii. However, I should prefer the other route in the interest of speed.

The name of my pastor is Martin D. Hardin. His address is 506 East Seneca Street, Ithaca, New York. Mr. Moran's address is 221 Eddy Street, Ithaca, New York. I am sure that both of these people will be glad to write you.

Thanking you again for all of your trouble which I deeply appreciate,

Yours sincerely,

L. A. Maynard

New York City, New York

Dear Mr. Garside:

Thank you very much for the information in your letter of November 25th.

I am sure that I can get the return sailing which I require on one of the Dollar Line boats. Therefore, I should like to have you purchase the round trip ticket for me, engaging the stateroom on the Cleveland as previously discussed. Mrs. Maynard is unable to decide at this time regarding her plans for the return trip. It is probable that she will decide to purchase a round trip ticket from San Francisco to New York. Therefore, I should like to have you make the reservation for her on the Cleveland with the understanding that sometime within a month she will decide regarding the return trip so that final arrangements can be made.

Can you inform me as to the cost of a round trip ticket from San Francisco to New York, tourist class to Shanghai, and first class the remainder of the trip?

Sincerely yours,

L. A. Maynard

Nanking

December 6, 1935

Dr. L. A. Maynard
Department of Agriculture
Cornell University
Ithaca, New York

My dear Dr. Maynard:

Let me acknowledge receipt of your letter of November 29th.

The cost of First Class transportation for Mrs. Maynard from Shanghai to New York would be approximately \$139 more than for her to go Tourist all the way. Taking \$368 as the cost Tourist, would thus bring the total of her ticket to around \$507. Since the fare from Shanghai to New York is given in English pounds, the equivalent in American dollars fluctuates with the rate of exchange.

The Dollar Steamship Line is reserving cabin #21 on the President Cleveland for you and Mrs. Maynard, subject to your final decision in the matter of tickets. They would probably not raise any objection to holding the matter open for another three weeks or so.

I have received very enthusiastic replies ^{to the inquiries} I sent to Mr. Moran and Mr. Martin. I have sent the various papers in regard to your appointment to the members of our Committee on Instruction in the Nanking Board of Founders and I am sure that their formal approval of your appointment will be consummated within a few days.

The one detail still remaining, which we should probably clear up at this time, is that of the usual health examination. The general policy of all of our organizations working in China is to have a routine health examination even for a person going out to China for as short a period as six months. Both Mrs. Maynard and yourself should also have typhoid inoculations and smallpox vaccination unless these have been received within a fairly recent date.

I enclose herewith the usual health blank for your use. The medical Secretary of the Methodist Board with whom we usually consult in these matters recommends Dr. Dean F. Smiley of your Cornell Medical School as a good man to give this examination. I believe that Dr. Smiley is quite definitely interested in China already, so no doubt he would be willing to serve. However, you can use your own family physician, or any other good doctor you may choose. The University of Nanking will pay the medical fee for this examination. Usually, doctors do not charge more than \$5.00 for such an examination and sometimes they are willing to give

December 8, 1935

Dr. L. A. Maynard
Department of Animal Husbandry
Cornell University
Ithaca, New York

My dear Dr. Maynard:

I have just received from President Y. G. Chen at Nanking a cablegram reading as follows:-

SPRING SEMESTER BEGINS FEBRUARY FIRST EXPERTS
DESIRED EARLIEST POSSIBLE MAYNARD BRING MATERIALS
NUTRITION CLASS CABLE DATES ARRIVAL

CHEN

I am wondering whether the field has just discovered that you are not planning to leave Ithaca until after February 1st and that the field is urging you to advance your sailing if possible. When you talked with Professor Buck last summer did you and he have a clear understanding as to the time when you would reach Nanking? Sailing on the Cleveland you will not reach Shanghai until March 2nd so you will miss practically five weeks of the spring term. I do not know how seriously this will affect the special work you are going to undertake.

If your work is to be largely experimentation and research, the date of your arrival may not be so important; but if your work is to be closely related to instruction, it might be almost impossible to get satisfactory results after such a late start. I do not have sufficiently detailed information regarding your plans to have any worthwhile judgment on these matters.

I have not yet cabled President Chen as to the date of your arrival for I thought it wiser to wait a few days until the final details in regard to your appointment are cleared up. As soon as I hear from you, however, I will send him a cablegram along any lines you may suggest.

Very sincerely yours,

INDEXED

Mr. B. A. Garside,
150 Fifth Ave.,
New York City.

Dear Mr. Garside:

I have just received your letter of the 8th quoting President Chen's cablegram.

I am quite sure that Professor Buck was familiar with the fact that I cannot get away from here until the first term closes, and that he realizes that this date is after February 1st since he was here last year. While he mentioned that they might like to have me give a course in nutrition this was rather incidental in the plans which we discussed. These plans concerned primarily research. Thus I cannot believe that this cablegram was meant to apply primarily to me. In granting Sabbatic leaves the University has not allowed a man to extend the time either before or following the leave unless he receives a specific leave of absence with a curtailment of salary accordingly. Thus it is absolutely impossible for me to get away until the close of instruction work. While the latter is not the actual end of the term since I have an examination to give, it is possible that I can give this examination during the last week of instruction and get away in time to catch a boat one week earlier, namely February 2nd. This is certainly the best that I can do and I shall write you within two or three days as to whether it can actually be accomplished. If I do this I shall probably have to return a week earlier accordingly.

You might inquire regarding the possibility of our getting accommodations on the boat which sails a week earlier.

Referring to your letter of December 6th I should like one more item of information with respect to cost of transportation. I should like to know the cost of the round the world fare "Home Town to Home Town", first class to Shanghai and tourist class from Shanghai to New York.

I shall attend to the matter of the physical examination this week.

I have written this letter without being able to consult sailing schedules prior to February 9th but it is my impression that there is a Dollar Line boat leaving San Francisco on the second.

Sincerely yours,

L. A. Maynard

Mr. B. A. Garside,
150 Fifth Ave.,
New York City.

Dear Mr. Garside:

Upon looking up the sailings at home last night I noted that the Dollar line boat sailing the week before the Cleveland is a slower boat and that I would not gain very much time. It now appears possible that I might be able to get away even earlier so as to catch the President Hoover, sailing January 26, providing I made a definite arrangement to get back earlier accordingly. I think this matter can be settled within the next couple days. However, I thought that in the meantime you might like to inquire regarding the possibility of accommodations on the Hoover. Naturally I am desirous of obtaining as good accommodations as are available on the Cleveland and I would hope that the cost would not be materially greater since Mrs. Maynard's fare is involved.

You will hear finally from me as to this matter within the next two or three days. From the cablegram I should assume that they would prefer to have me come as early as possible and leave early accordingly. So far as I can see this will not make any difference as far as research work is concerned.

Sincerely yours,

L. A. Maynard

December 13, 1933

Dr. L. A. Maynard
Agricultural Experiment Station
Cornell University
Ithaca, New York

My dear Dr. Maynard:

Let me acknowledge receipt of your letters of December 11th and 12th.

I have made inquiries at the Dollar Line office as to the possibility of your getting accommodations on the Hoover. The Hoover is a larger and more comfortable ship than the Cleveland, and the tourist accommodations cost a little more. However, you cannot get a tourist cabin on the Hoover with a private bath. The net increase in the tourist rates for the Hoover would be about \$15.00 per ticket. The Dollar Line is now allowing \$95.00, however, for the rail journey across the United States instead of \$86.00 as was quoted to you previously so the actual increase in your accommodation on the Hoover would be only about \$7.00 above the figures I quoted you on November 22nd.

In your letter of December 11th you asked for "the cost of the round-the-world fare 'home town to home town' first class to Shanghai and tourist class from Shanghai to New York." Thus far, we have discussed chiefly tourist class to Shanghai and first class the rest of the way so possibly that is what you intended to ask for. In any event, the facts are these:- round-the-world tourist class costs \$439. If the passenger provides his own transportation across the United States, \$25.00 is deducted from this cost. If first class is used from San Francisco to Shanghai, U.S. \$96.60 is added. If first class is used from San Francisco around to New York, £27 sterling is added, using the prevailing rate of exchange. On this basis, the cost from San Francisco around to New York, going first class to Shanghai and tourist the rest of the way, is \$535.60. Going tourist from San Francisco to Shanghai and first class the rest of the way is \$580. These are basic rates for the Cleveland. For cabin #21 with private bath, \$14.00 is added. If the Hoover instead of the Cleveland is taken, \$30.00 is added. All the above figures are subject to 5% discount as I explained previously. This information will enable you to figure any combination of accommodations as you desire.

For the present, the Dollar Line is holding your tentative reservation on the Cleveland while we are making a final decision.

I would judge from President Chen's cablegram that the field would be very glad to you could get to Nanking as soon after February 1st as is at

all convenient for you. So if you can arrange to leave Ithaca in time to catch the Hoover on January 26th, that would appear to be the better course. I am sure that the field would be perfectly agreeable to your leaving at a correspondingly earlier date.

During the last fortnight, the papers related to your appointment have been circulated among the members of the Candidate Committee. All of them have warmly approved your appointment, so we can consider that an accomplished fact, though I will write you more formally on that point as soon as the details of your medical examination and date of departure are settled. Some members of the Committee would call attention to the fact that we always ask candidates for a frank statement of their personal religious belief and experience. We never wish to make such a statement seem too formidable but the Committee would welcome whatever statement you care to make.

Very sincerely yours,

B A GARSIDE

 150 Fifth Avenue
 New York City, New York

Dear Mr. Garside:

I thank you for your letter of December 13th. I am sorry that I rather mixed things up in my letter of December 11th. I am now ready to go ahead with the final arrangements and request that you engage passage for us as follows.

1. A stateroom for Mrs. Maynard and myself, tourist class, from San Francisco to Shanghai on the Hoover. Since we have no plan of the boat and know nothing about it we would appreciate you using your own judgment as to the most suitable accommodations which are available.

2. A round-trip tourist ticket for myself from San Francisco to Shanghai and back to San Francisco or Seattle.

3. A ticket for Mrs. Maynard, tourist class from San Francisco to Shanghai and first-class from Shanghai to New York.

I enclose a report of the physical examination which through error was sent to me instead of direct to you. This examination was made by my family physician. I shall ask him to send his bill direct.

Sincerely yours,

L. A. Maynard

Dr. L. A. Maynard
Laboratory of Animal Nutrition
Cornell University
Ithaca, New York

My dear Dr. Maynard:

Let me acknowledge receipt of your letter of December 15th, and since this letter deals with a number of different matters I will take them up in order.

Steamer Reservations. We have made reservations for Mrs. Maynard and yourself on the President Hoover sailing from San Francisco to Shanghai on January 26th. The cabin reserved for you is #154. Under separate cover I am sending you a cabin plan of the Hoover (this is a somewhat battered plan, but is the only one we have available at the moment). You will note that cabin #154 is very well located, being almost amidships and very convenient in its relationship to the dining room, bath room facilities, and stairways. It is, however, an outside cabin and should be quite private and quiet. The white square just beside your cabin on the plan is a ventilator which, the Dollar Line assures me, does not have any machinery in connection with it so it should add to your quiet and privacy.

Tickets. The cost of your tickets will be as follows:-

Dr. Maynard.

Out-going trip, San Francisco, to Shanghai on the Hoover, and return from Shanghai to either San Francisco or Seattle on any of the Dollar Line boats except the Hoover and Coolidge.

Adjustment in Travel Expenses. The above cost of \$839.40 for steamer tickets is more than the cost of your own out-going to Shanghai first class, but is probably somewhat less than your journey to and from the field. I would suggest, therefore, that, if satisfactory to you, I will report to Nanking that I have advanced the sum of U.S. \$839.40 on account of your travel, and will request the field to make whatever adjustment with you is mutually agreeable, either immediately after you arrive in Nanking or else just before you begin your return journey. On your journey to Nanking, please keep a record of your necessary expenses for railway travel, hotel accommodations, and other incidental expenses, so that you will have these figures available if the field needs them in estimating what your first class travel would cost. Our University regulations make the following provisions with regard to travel. "The University expects economy to be observed. It allows first class railroad travel..... moderate priced hotels; meals; tips up to \$15.00 per adult for the entire trip; passports; baggage transfer; taxicab if necessary."

Medical Papers. I have shown your medical report to Dr. Vaughn, our regular medical advisor, and have gone over it informally with him. He states that the report is satisfactory, and has authorized us to go ahead with the steamer reservations. Within a few days he will be sending us a formal report, of which I will send a copy to you. This report will contain the usual recommendations for vaccination and typhoid inoculation both for Mrs. Maynard and yourself. Since Mrs. Maynard and the children are not directly involved in your appointment, no formal health reports for them will be necessary. However, Dr. Vaughn quite rightly calls attention to the desirability of our being quite sure that both Mrs. Maynard and the two children are in satisfactory health. While I understand that the children are not accompanying you to China, if there were any serious health problems confronting either of them, that would of course constitute a very serious embarrassment of your work. The Doctor suggests, therefore, that Mrs. Maynard fill out and return to us the first two pages of general information on the enclosed health report, and that we ask your family physician to give at least a general statement as to the health condition of Mrs. Maynard and the two children. No doubt your family physician is already thoroughly acquainted with the physical condition of Mrs. Maynard and the children so this will not involve any great amount of additional trouble.

Other Matters. We will be mailing you your steamship tickets some time next week. If you have not already taken steps to secure your passport it would be well for you to begin on that in the fairly near future. Usually a fortnight is all that is required, but just at this time of the year there are apt to be delays. I am enclosing application forms for eastern and western clergy certificates for Mrs. Maynard and yourself. If you will fill these out and return them to our office in accordance with the instructions accompanying the form, we will secure the certificates and have them mailed to you. The cost of the four certificates will be \$8.00 and will be added to the \$839.40 itemized above. Please call upon us freely if we can assist you in any other matters connected with your journey.

Very sincerely yours,

B A GARSIDE

Dear Mr. Garside:

We are delighted with the steamer reservations mentioned in your letter of December 19th.

The arrangement regarding traveling expenses is entirely satisfactory.

I feel that you are quite right in asking for a statement regarding the health of Mrs. Maynard and the children. This will reach you in due course.

We shall fill out the application forms for the certificate and mail them shortly. Please advise what the answers should be to the question relating to "Ordained or licensed" I assume it should be "neither" for both of us.

Dear Mr. Garside:

The steamship tickets have been received.

I am enclosing:

1. Applications for clergy fare certificates made out by Mrs. Maynard and myself.
2. A statement regarding the health of our children.
3. A statement regarding Mrs. Maynard's health.

I have not yet received any formal directions relative to the inoculation for typhoid and small-pox. We are starting the typhoid inoculation today in view of the time element involved.

Mrs. Maynard is planning to leave Ithaca about January 15th. I shall leave on the 19th or 20th.

Sincerely yours,

L. A. Maynard

TRANSMITTED

Nanking

December 29, 1933

Dr. L. A. Maynard
Agricultural Experiment Station
Laboratory of Animal Nutrition
Ithaca, New York

My dear Dr. Maynard:

Let me acknowledge receipt of your letter of December 27th.

We are enclosing herewith the eastern Clergy Certificates. The western Certificates will be mailed direct to you.

I am passing along the health statements for Mrs. Maynard and the children to our medical advisor. I am quite sure that he will find them entirely satisfactory. You are quite right in going ahead with typhoid inoculation and smallpox vaccination. We should have received the formal medical report from Dr. Vaughan before this, but there is no need in waiting for it to proceed with these treatments.

There is a possibility that you may have another couple bound for Nanking sailing on the Hoover with you. We are now negotiating with Mr. Olin W. Farrington with a view to his appointment for special work in Cooperative Marketing. (This is the position to which Professor Harper of Cornell was invited but which he could not accept). If Mr. Farrington is appointed it is quite possible that he and his wife will also sail on the Hoover. I am sure that the four of you would find this a pleasant arrangement.

Very cordially yours,

BAG:MP

Nanking

January 11, 1934.

Dr. L. A. Maynard,
Dept. of Animal Nutrition,
College of Agriculture,
Ithaca, New York.

My dear Dr. Maynard:

I have your letter of January 9th reporting progress in your plans for sailing, and asking whether there are any other requirements to be met before you leave.

I believe that we have now unwound all the necessary red tape (many yards of it I fear) and that the way is now clear for you to start for the field. For all regular appointees a formal employment agreement is entered into between the University and the appointee, but in your case I believe this is not necessary. The condition of your appointment is clearly set forth in the letter President Chen wrote you October 20th, and your acceptance of this letter under date of December 4th, 1933 appears to be all that is required to complete our records on this point.

The hope I expressed that you might have other Nanking appointees on the Hoover with you did not materialize. We thought that we would be able to send out a man in cooperative marketing, but at the last minute found he could not get away from his present work.

We trust that you and Mrs. Maynard will have a very pleasant journey, and most happy period of service at Nanking. I am sorry that I will probably not have the opportunity to meet you personally before you sail for China, but I hope that after your return we may be able to make some arrangement to meet the members of our Nanking Board of Founders and tell them of your work and your impressions of China and of the University.

Very sincerely yours,

B A GARSIDE

April 21, 1934.

*Noted
MAG*

Dr. L. A. Maynard,
University of Nanking.

Dear Dr. Maynard:

Before I leave I wish to make record of the adjustment of the travel account as I have figured it out. Will you please look it over and if it is not correct, I am sure Mrs. Slocum or Mr. Sie and adjust it for you.

According to information received from the agent of the Dollar Steamship Lines, the following amount would be available for a round trip first class ticket:

1. Round trip first class ticket	G\$	4 87.80	
2. Round trip expenses Ithaca to Shanghai, tips etc.		250 00	
3. Expenses in Shanghai - outcoming		41 14	
4. Expenses Nanking - Shanghai - return		<u>20 00</u>	G\$798 94

The total amount advanced through the New York office was G\$839 40 plus 8.00 for clergy certificates, making a total of 847 40. If these figures are correct, you will owe us a refund of G\$48.46 in order to equal the total estimated to cover the trip Ithaca to Nanking and return to Ithaca.

I have estimated the expenses in accordance with your expense account, but believe we have allowed sufficient to cover any emergency inasmuch as you will not have the cost of visas or passports on the return trip. If there is a refund, will you please send the same with your report to Mr. Garside of the New York office? I will send him a copy of this letter so it will be quite clear as to our settlement.

I am sorry that I will not see you before leaving, but will take this opportunity to say farewell by note to both you and Mrs. Maynard. I am sure Mr. Sie ^{will} arrange for any checks that need to be cashed for you. Also as a matter of information, you may like to know that the Nanking representative of the Dollar Steamship Lines is Mr. Sangster who has an office in Drysdale & Co. -Telephone 41158. In case you have any question about return bookings, I am sure he can help you. If you call him up or else drop a note, he will very likely call upon you.

Sincerely yours,

Elsie M. Priest.

LABORATORY OF ANIMAL NUTRITION

ac 8/14/34

August 11, 1934

Mr. B. A. Garside
150 Fifth Ave.
New York City

Dear Mr. Garside:

I include a statement of my expense for the return trip from Nanking to Ithaca. These expenses were increased somewhat due to the fact that Dr. Buck asked me to go to Tokyo to the office of the Institute of Pacific Relations and also to spend a day at Stanford University with Dr. Alsberg of the Food Research Institute.

The following indicates that \$146.31 was advanced me for my return trip according to the letter from Mrs. Slocum to me dated May 8th.

Other return trip expense,	\$250	
Ithaca--Shanghai		
Expense in Shanghai, outcoming	41.14	
Expenses, Nanking--Shanghai, re-		
turn	<u>20.00</u>	
Total to be accounted for		\$311.14
Expense account submitted to Miss Priest		<u>164.83</u>
Balance to be accounted for		\$146.31

Thus, according to the above, I should remit \$7.08, since my expense account here submitted is \$139.23. However, I figure that there are additional amounts which should be credited to me as follows: In your letter of December 19th it is indicated that a 5% discount was obtained on the round trip ticket. However, in Mrs. Slocum's letter she specifies a 10% discount. The minimum first class round trip fare was \$605. A 10% discount would reduce this to \$544.50, thus there is a difference of \$30.25, which should be allowed me since I was to be allowed a minimum first class fare subject to discount, and since the discount received was actually 5% instead of 10%. In your letter of December 19th, I was debited with \$5 tax which was part of the cost of the ticket and which represented money advanced to me. Miss Priest's letter of April 21st lists the total amount advanced to me as \$847.40, which included this \$5 and

change*

2
7
5
3
6
5
7

0745

Mr. B. A. Garside--2

August 11, 1934

and also \$4 which was paid for a clergy certificate.
Mrs. Slocum's letter gives me credit for the clergy
certificate but does not give me credit for the \$5
tax.

If I am correct in the above, there is a total
due me of \$35.25 from which should be subtracted the
\$7.08, leaving a net balance due to me of \$28.17.

Sincerely yours

LAM:JMS

Professor L.A. Maynard
New York State College of Agriculture at Cornell University
Cornell University Agricultural Experiment Station
Ithaca, N.Y.

My dear Dr. Maynard:

Let me formally acknowledge receipt of your letter of August 11th, with its enclosed statement of your expense account on your return trip from Nanking to Ithaca, together with the payment of \$2.08 to cover the balance due the University.

In accordance with our corrected records you had received in all \$859.64 on account of your travel, and had expended \$857.56, leaving a balance of \$2.08 which you have now repaid.

We are all very grateful for the fine service you rendered Nanking during your months in China, and are confident that you will continue to have a warm interest in the work at Nanking, and will be glad to assist in any way you can in telling of the work being done there. I hope that we may find some opportunity for you to meet members of the Nanking Board of Founders and for you to bring them news of what is now going on at the University.
