Dr. N. Gist Gee,  
Yenching University,  
150, Fifth Avenue,  
New York, N.Y.

Dear Dr. Gee:

Your favor of Sept 4 was duly received.

Ever since I arrived here on the 1st of September, I have been carrying on research on cyto-genetics of *Drosophila pseudo-obscura* under the supervision of Professors Morgan, Sturtevant and Dobzhansky. You may have heard of the recent advancement in the field of genetics, that is, the separation of chromosome into genes through the study of salivary gland chromosomes. This new discovery made by Prof. Painter in Texas marks the new era in the history of genetics. All genetic phenomenon due to chromosome aberrations could be studied with better advantage in corporation with the corresponding investigation in salivary gland chromosomes. My work here is a combination of both cytology and genetics; in fact they are not separable in the light of modern genetics. By the time of Christmas, I expect to finish one piece of work on the salivary gland chromosome structure and its phenomenon of genetic inversion in *Drosophila pseudo-obscura*, which will be sent for publication. My further work will be the determination of cytological map of this rather new species of fruit-fly through the study of translocations and inversions obtained by X-ray treatment. This piece of research will probably take me a couple of years and may be presented as doctorate thesis.

As to my application for Rockefeller fellowship next year, I thank you very heartily for your instruction given to me in your last favor. Dr. Morgan and the other professors of mine shall be glad to endorse and support it. I shall ask Pres. Yang of Soochow University to send in his recommendation as soon as Dr. Gunn arrives at Shanghai. I shall refer you and Drs. Wu, Boring and Li for furnishing recommendations for me. I shall write to Dr. Gunn reporting my work in China as well as here before long, and at the same time solicitating his help in finishing my training, which ~~has been~~ <sup>was in the past taken</sup> cared by the Rockefeller foundation considerably. But before I shall write him, I like very much to know somewhat about the changes of the Foundation policy in China. Unless the ~~the~~ old policy keeps on working, I shall find the grant of my application with difficulty. In this case, would it be more appropriate to send in application to the New York office? I do not know what the present situation is. I wish you may inform me the conditions and give advice toward the success of my plan.

Enclosed, you will find a list of names of Yenching Alumni coming here last August. I am,

Respectfully yours,

*C. C. Tan*

0145

November 7th, 1934

Mr C.G. Tan,  
Department of Biology,  
California Institute of Technology,  
Pasadena, Cal.

Dear Mr Tan:-

Thank you for the help with the Yenching list. We had most of the list but were glad to have the additions which you gave and also more details of some of the others who were already on our list. We will send you and Mr Meng a copy soon.

I was glad to learn of Professor Painter's work on genes. Especially interesting is the note concerning the finding of these in the salivary glands. I am afraid that I have let a good deal of modern genetics slip by me while I was trying to find a few dollars for Yenching University. I hope you and Mr Meng will be interested to find some new friends out there for us and get them ready to advise some professorships at Y.U. for us. If it can be arranged, I am very eager to get back out there next spring.

It would be wise for you to send copies of the things which you send to Mr Gunn to the Director of the Natural Sciences of the Rockefeller Foundation here in New York also. This would make it doubly sure that there was no overlooking of your application. If you get the full endorsement of your professors there I think that you will get your renewal all right. Mr Gunn will probably recommend action on your application since these things are always referred to the field, but it would not hurt to have copies, marked as copies, in the hands of the New York office too.

I hope that everything is working out nicely in your problem and that you are enjoying America. Let this bring to you and to Mr Meng our best wishes for your good health and your success in your present undertakings.

Very sincerely,

H. Gist Gee.

May 20, '940.

Dear Mrs. Macmillan:

It was quite an experience,  
sitting with the Yenching Committee  
and the Trustees - a sort of glimpse  
into "what makes it tick". I shall  
go to my new responsibilities with  
fresh confidence, knowing that we  
are not alone in our endeavors.  
We of Yenching feel a deep appreciation  
for the material and moral support  
which your office and the American Board  
are giving to the Youth of China.

Yours sincerely,

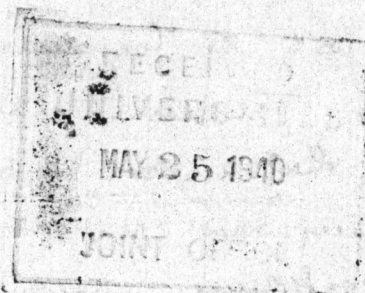

Tan Pin-Pin

Mrs. T. D. Macmillan,  
China Colleges,

Mr. C.A. Evans,  
150 Fifth Avenue,  
New York, New York.

Dear Mr. Evans:

You have been very patient with me, and I do appreciate all that you have done for me. When I telephoned from Connecticut, it was just after the decision was made, and I could not have explained over the telephone.

It was after I had called at your office that Friday that I went to present my final report to Mr. Lemmon, the president of WRUL. He had on previous occasions commented kindly on my work, and expressed a desire to have me continue another season with this station, but I had always taken all that as merely words of encouragement. This time, however, he asked me to consider them as a serious offer, pointing out that, in view of the latest developments in the Far East, my parents would want to have me stay here for a while. We decided that my parents had to be consulted, and cabled for their approval.

The decision has not been an easy one. I have always wanted to be on the Yenching Faculty, have been looking forward to it all this past year. But from the point of view of Basic English, it is unquestionably more important to get one project firmly on its feet than to start a new one. My only regret is that all this has come up at the eleventh hour, for I realize how very inconvenient it must be for Yenta.

I have not put my Basic work above my duty to Yenta and China. But for <sup>the</sup> inconvenience to the university, I feel that my working here in my present capacity will be of greater service all around than will my teaching freshman and sophomore English. I hope I am right in this, and that indirectly I may be able to make up for the trouble I have given you and Yenching.

Please excuse the lack of coherence in this letter. I have just got back to town, and want to send you this right away. When Mrs. Macmillan returns, she may be interested in seeing this. She has been very kind to me, and I would like to have her understand my position. I hope you will.

With sincere thanks and apologies,

*Tan Pin Pin*

Dear Mr. Evans:

Some time ago, you were kind enough to discuss with me the possibility of my going back to China this fall. I have just received a letter from Miss Spear indicating that there might be an opening for me at Genching. My work here has just been completed, and I am free to go at any time. Could you please tell me whether and how soon a priority could be obtained, and approximately when I could expect to leave, so that I might make my plans for the coming year?

I am spending a few days with friends at the above address.

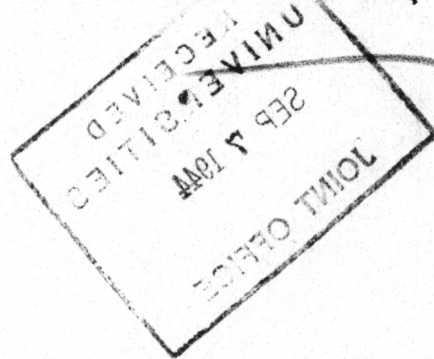

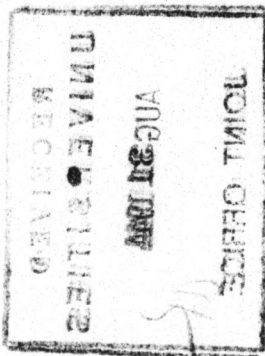

and would be most grateful if you  
could write me there at your  
earliest convenience. If you  
would like to go over the  
matter with me more thoroughly,  
I could come to New York  
any time you suggest.

I have just come back from  
a summer in Madison, Wisconsin,  
with its many lakes and pleasant  
weather. I hope you have enjoyed  
a cool summer, too.

With best regards,

Very sincerely

P. P. T. An

Dear Mr. Evans:

Your kind letter has just been forwarded to me, and how welcome the news would have been, just a little earlier! You see, since your last letter, telling me of the State Department decision in re priority for travel to China, a most unexpected development has made it necessary for me to change my plans.

When I saw from the State Department ruling that there was little chance of my getting to China this year, I cabled the fact to my fiancé, who decided to come to this country instead. Such a possibility had never occurred to me, as he was then in the Army Medical Corps. I only had definite word about two weeks ago, and would have written you right away had I thought there was still chance of my  
any

getting a priority. I am terribly  
sorry to have put you to  
all that trouble, and to have  
to tell you of a change of  
plans now. Truly, under any  
other circumstances I would  
be overjoyed to have such an  
opportunity materialize.

You have been most kind  
and patient, and I hope  
you will accept my sincerest  
apologies for all this! Also,  
please excuse the scrawl -  
I am getting new glasses, &  
with those drops the doctor  
put in, I can hardly see,  
but wanted to write you  
immediately to prevent any  
further inconvenience to  
you. My warmest thanks for  
your many kindnesses. Very sincerely  
Lin Lin Tân

getting a picture of them  
 saved to have put in to  
 all that has been, and to have  
 to tell you of a change of  
 place now. Truly, under any  
 other circumstances I would  
 be surprised to have such an

Dear Miss T'ans:

My folder of travel to China has just brought to light your letter of October 9th which I was hoping would be answered by you in announcing the arrival of the fortunate young man.

The reason for holding this letter was that I never did cancel your sailing but I have changed the name. At the present time we just don't cancel any reservations; we take anything we can get and suit the person to the opportunity. However, I want you to know that we have shifted things now so there is no responsibility on your part except that some day we would like to meet the friend from China.

With the Season's Greetings to you, I am

Most sincerely yours,

CAB:EW.

September 8, 1944

Miss T'ien Pin Pin  
178 Berkeley Street  
Lawrence, Mass.

Dear Miss T'ien:

I could not reply immediately to your letter of August 30th although same was sent to me when I was absent from the office for a vacation. First of all, I did not have in hand the latest information regarding travel to China and I say "latest" meaning development within the last week as representatives of the Foreign Missions Conference were then in New York conferring with the State Department about the possible chances of securing passports and visas for those going to China.

The conclusions are, at the present time, that it will be next to impossible to secure sailings in the immediate future. Conditions, as you well know, would interfere with the State Department relaxing any regulations at the present time. One person has said that there will be no relaxing until next spring. I hope that is not true. I would think that for the next two or three months, however, that it would be impossible to considering going back. I will write you later when I get any new information.

Please keep in touch with me giving me your latest address.

Very sincerely yours,

C. A. EVANS

燕京大學  
YENCHING UNIVERSITY  
PEIPING WEST, CHINA.

Sept. 25, '34.

Dr. N. Gist Gee,  
150 Fifth Avenue,  
New York, N. Y.,  
U. S. A.

Dear Dr. Gee,

Thank you very much for you had drop down a few words in the Rockefeller Foundation Office in Far East at Peiping 1932 when you left China; from that statement my fellowship is renewed this year 1934-35 and therefore I am now in Yenching for study. My problem is an old one, "Morphology, Anatomy and Taxonomy of Chinese Pentatomidae (Hemiptera)" under directions of Dr. C. F. Wu and will be finished in the winter.

As far as I know, there is no person work on the Chinese marine sponges and the problem is started by myself one year before at Amoy. The collection is not a large one, it contains more than 100 species from Amoy, Hongkong, Hainan and Tung-San (a small island near Fukien and Kwangtung Provinces), and may be a well representation of marine sponges of South China. Other collections will be also received such as from Tsingtao and Chefoo. All the specimens are preserved in 95% alcohol.

The pre-worker of Chinese marine sponges is Dr. H. V. Brondsted who worked on the material from Amoy sent by you to Dr. W. Arndt (Berlin) for identification, from whom the specimens is transferred. His paper (1929) includes only four new species without a list, which is also not find in the file of the Museum of the University of Amoy. I am hopping that if you can help me to ask either Dr. Arndt or Dr. Brondsted to send me the blank with numbers and determinations. This will help me out a lot.

燕京大學  
YENCHING UNIVERSITY  
PEIPING WEST, CHINA.

May I have all the reprints of marine sponges from every authority in your hand if these are not useful to you? Will you please introduce me to some authorities either in Europe, U. S. A. or other places to get informations? Hoping you have time to write me any thing related to this particular problem. I should be much obliged by you sending me suggestions, encouragements and all the thing what I need. With kind regards to your family.

Sincerely yours,

*D. S. Tang*  
D. S. Tang.

P.S. I ask your pardon for my English.

*Tang*

October 22, 1934

Mr. D. S. Tang  
Yenching University  
Peiping, China

Dear Mr. Tang:

I am very much interested in your letter of September 25th which has just come. I am very glad that you are able to remain at Yenching and carry on your work.

I regret very much that I do not have access to my reprints since they are all put away and I am in a New York apartment where we have no room to spread out things of this kind. I would suggest that you write to Mr. M. Burton, British Museum, Natural History Section, London, England, for his reprints. He, I guess, is probably the most active sponge worker in the field at the present time and I believe he would cooperate with you in any way possible. I would also suggest that you write to the Indian Museum, The Zoological Survey, Calcutta, India. They publish articles from time to time on sponges. Dr. Arndt of the University Zoological Museum, 4 Invaliden Strasse, Berlin, Germany, is a splendid correspondent and I am sure that through him you could secure directly any assistance he might be able to give you. He is one of the best correspondents I have found among scientific men.

It would be interesting to have Mr. Burton or Dr. Brondsted check your identifications before you publish on this subject. It is a highly specialized field and unless you have much comparative material and complete literature you are likely to fall into error. I do not know of anyone else to whom you might look for assistance in work on this subject.

You know my wish for China that there may be one or two collaborating specialists in each of these fields of study and I am glad that you have gone into sponges and hope you will become the specialist in that field. I am sorry I do not have an opportunity under present conditions to help you out to any extent.

With all good wishes for your success in your undertaking, I am

Very sincerely,

NGG:HW

## EXPLANATIONS

### MARKING SYSTEM:

Prior to the spring semester of 1935

| Grade       | F       | P       | M      | G    | E         |
|-------------|---------|---------|--------|------|-----------|
| Description | Failure | Passing | Medium | Good | Excellent |
| Merit value | 0.0     | 0.5     | 1.0    | 1.5  | 2.0       |

No university credit is given for any course with a grade of "F".

Since the spring semester of 1935

| Grade*<br>and<br>merit value | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|------------------------------|---|---|---|---|---|---|---|---|---|---|----|
|------------------------------|---|---|---|---|---|---|---|---|---|---|----|

No university credit is given for any course with a grade of "2" or less.

**MERIT POINTS** for a course are obtained by multiplying the number of credits for the course by the merit value of the grade received.

**AVERAGE GRADE** is the ratio of the total number of merit points obtained within a certain period of time to the corresponding total number of credits registered for the student. In general three kinds of average grade are distinguished and used in the University: *semester average grade*, *annual average grade*, and *general average grade*. If a student enters the University with advanced standing, his work in the former institution may be given credit, but such accepted advanced credits will not be used in the computation of the general average grade.

\* Where there are reasons to believe that the achievement of students in a course is distributed normally, or that the students are relatively unselected, the following table, set up in 1941, is taken as a guide for deciding the proportion of students to be placed in each grade:

| Grade and<br>merit value | Description               | Per cent. of class to<br>receive each grade |
|--------------------------|---------------------------|---------------------------------------------|
| 0                        | Worthless                 | 0-1                                         |
| 1                        | Very poor                 | 1                                           |
| 2                        | Poor                      | 3                                           |
| 3                        | Barely passing            | 8                                           |
| 4                        | Intermediate              | 16                                          |
| 5                        | Just below average        | 22                                          |
| 6                        | Just above average        | 22                                          |
| 7                        | Superior                  | 16                                          |
| 8                        | Very superior             | 8                                           |
| 9                        | Brilliant                 | 3                                           |
| 10                       | Extraordinarily brilliant | 1                                           |

These proportions are usually applicable in elementary courses or in classes that are fairly large in size; in advanced courses or in classes that are small in size, instructors will naturally use their own judgment in departing from them.

| 1925 to 1926                                           |                                                                           | Freshman   |       |              | Fall    |       |              | Spring  |       |              |
|--------------------------------------------------------|---------------------------------------------------------------------------|------------|-------|--------------|---------|-------|--------------|---------|-------|--------------|
| Course number                                          | Descriptive title                                                         | Credits    | Grade | Merit points | Credits | Grade | Merit points | Credits | Grade | Merit points |
| Chin.7-8                                               | Freshman Chinese Studies                                                  | 3          | M     | 3            | 3       | M     | 3            | 3       | M     | 3            |
| Chin.9-10                                              | Freshmen Chinese Composition                                              | 1          | G     | 1.5          | 1       | G     | 1.5          | 1       | G     | 1.5          |

**STATUS:** Students whose general average grade is 1.00 (old marking system) or above are in good standing. Only students in good standing are allowed to graduate. Students whose semester average grade falls below 3.4 (new system), whose annual average grade for any year falls below 4.2 (new system) or whose annual average grade for each of any two consecutive years falls below 1.00 (old system) 5.0 (new system) are dismissed on account of poor work.

**A CREDIT HOUR** in the University is 50 minutes of class work per week throughout a semester of 18 weeks requiring about two hours of outside preparation. Three hours per week of laboratory or field work throughout a semester are considered equivalent to one credit hour.

**CLASSIFICATION:** Students in the undergraduate Colleges are classified once a year before the registration period for the fall semester. Except under special conditions, they are classified on the basis of the number of credits obtained prior to September 1 according to the following table:

| <i>Classification</i> | <i>1932-1939</i> | <i>1939-1940</i> | <i>1940-</i> |
|-----------------------|------------------|------------------|--------------|
| Freshman              | 0- 18            | 0- 25            | 0- 18        |
| Sub-sophomore         | 19- 35           | 26- 37           | 19- 25       |
| Sophomore             | 36- 54           | 38- 69           | 26- 47       |
| Sub-junior            | 55- 71           | 70- 75           | 48- 69       |
| Junior                | 72- 88           | 76-105           | 70- 87       |
| Sub-senior            | 89-103           | 106-109          | 88-107       |
| Senior                | 104-135          | 110-141          | 108-141      |
| For graduation        | 136*             | 142†             | 142†         |

**COURSES:** For full description of the Course of Study, see Yenching University Bulletins, sent out on application to the Registration Bureau, Office of the Director of Studies.

\* This number does not include six credits of Required Physical Education or its equivalent.

† This number includes 6 credits of Required Physical Education.

WARTIME ADDRESS: THE HOSTEL, PETERHOUSE, CAMBRIDGE. TEL.: CAMBRIDGE 55294

THIS IS TO CERTIFY that Mr. TANG, Ping-Liang, was registered as a postgraduate student in the Department of Transport of this School from October, 1937, to June, 1939. He was actually registered for the M.Sc.(Econ.) degree of the University of London, with General Subject "The Economics of Railways" and Special Section "Railway Statistics". He did not in fact secure his degree before he had to leave England, but reports on his intelligence, keenness and hard work were throughout highly satisfactory, and it is possible that since he has completed his course of study he may be allowed to take the examination in some centre like Hong Kong without returning to England, though this may not be possible till after the end of the war.

Dean of Postgraduate  
Studies

17th November, 1941.
